# The world's most popular CMS secured for government

Government agencies must balance security, compliance, and public engagement with efficiency. WordPress VIP combines the power of WordPress, the technology that runs 43% of the web, with a smarter approach to cybersecurity and IT modernization that balances efficiency, cost, and long-term sustainability. WordPress VIP is the only WordPress platform to earn a FedRAMP® Moderate Authorization to Operate (ATO).

NOW WITH MODERATE ATO

FedRAMP
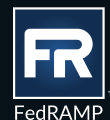

Enterprise-grade security

WordPress VIP is purpose-built to defend government agencies from modern digital threats, including at the state, local, and federal level. Here's how WordPress VIP helps your organization reduce risk while ensuring compliance.

Operational Flexibility

Cloud-native managed platform reduces human & operational overhead

Multisite (networked) CMS scales consistent branding, content, and control

WCAG 2.0 AA compliance enables inclusion for users, publishers, and builders

Version-controlled management of platform code and customer software reduces attack surfaces and heightens security

Vulnerability Management

Immediate issue response, including rapid patching

Plugin scanning using proprietary WPScan technology

Network-wide DDoS protection

Network and host-based firewalls

Network Security

Secure inter-component communication (if required)

Testing as required by FedRAMP program

Internal and third-party security testing

Data Protection

Penetration testing

Fully containerized database environment, including database infrastructure

File system read-only mode to protect against backdoor attacks

Optional controls to ensure data residency in the United States (if required)

Security Testing

Testing as required by FedRAMP program

Internal and third-party security testing

Penetration testing

Access Control

Role Based Access Control with MFA and federated SSO

Brute force password protection

Strict customer data access control

Physical security at data centers

Activity log monitoring

WordPress expertise and experience

Leverage the deep expertise WordPress VIP brings from working with the most robust, scalable digital platforms on the web. Our platform is built and maintained by individuals with direct involvement in the WordPress ecosystem, including core contributors, architects, and founders of the project itself. These deep roots provide an unparalleled understanding of WordPress' capabilities and best practices, particularly when applied to performance, scaling, and security.

Deep support

Support for all core infrastructure

Support for application code, including debugging

Access to WordPress best practices and expertise

Optional periodic security reviews

Government partnership

Unique understanding of government agency requirements, including FedRAMP compliance

Continuous monitoring (ConMon) reports and Plans of Action and Monitoring (POAM) for each customer, annual recertification

Disaster Recovery

Multiple levels of on/offsite backup

Emergency and contingency plans, including redundant storage and procedures for recovering data

Custom disaster recovery plans and procedure definitions

Empower your public agency

WordPress VIP helps government agencies create efficiencies with out-of-the-box solutions in an innovative manner. Rely on a secure, and scalable platform that reduces the risk and cost of running your site and other digital properties. Learn how WPVIP can help your agency deliver secure, scalable, and engaging experiences today.
